	Document No.	ESMA-1005	Rev	C	Page	2 OF 6
	CAUTION: Check for latest revision of this document before use. Information contained in copied or printed material may be superseded.					

1 SCOPE

- 1.1. This document provides specifications for carbon steel material with 60 ksi minimum yield strength used for producing load bearing or pressure containing component parts in TAM products.
- 1.2. **Material specified by this document is compliant to NACE MR-0175, Part 2 Annex A (ISO 15156).**

2. ACCEPTABLE MATERIALS / CHEMISTRY

Material shall be carbon steel meeting the following chemistry requirements:

- Carbon (C) 0.22 – **0.35 %**
- Manganese (Mn) 0.60 – 0.90
- Phosphorus (P) .040 Max
- Sulfur (S) .050 Max

3 MECHANICAL PROPERTIES

- 3.1 The mechanical properties of this material shall conform to the following requirements:
 - 3.1.1 80,000 psi minimum yield strength as determined in accordance with ASTM A370,
 - 3.1.2 90,000 psi minimum tensile strength as determined in accordance with ASTM A370,
 - 3.1.3 Minimum Elongation of 10%,
 - 3.1.4 Material shall have a Minimum hardness of HRB (HRC 11) and a Maximum hardness of HRB 99 (HRC 22) as determined in accordance with ASTM E18.

NOTE: No other mechanical properties are required by this specification to be reported unless otherwise specified.

4 WELDABILITY

- 4.1 **Material weldability shall meet or exceed the requirements listed for ASTM 519, P1 materials as identified in ASME BPVC-IX.**

Ferrous and Nonferrous P-Numbers

Spec No.	Type/Grade	P-No.
A519	1018 CW	1
A519	1018 HR	1
A519	1020 CW	1
A519	1020 HR	1
A519	1022 CW	1
A519	1022 HR	1
A519	1025 CW	1
A519	1025 HR	1
A519	1026 CW	1
A519	1026 HR	1

5 DIMENSIONAL TOLERANCES

5.1 Unless otherwise specified, dimensional tolerances shall comply with the following:

- 5.1.1 Plates shall comply with the dimensional requirements of ASTM A568.
- 5.1.2 Tubes shall comply with the dimensional requirements of ASTM A450.
- 5.1.3 Bars shall comply with the dimensional requirements of ASTM A29.
- 5.1.4 Shapes shall comply with the dimensional requirements of ASTM A6.

6 REPORTS

6.1 Material ordered to this specification shall be accompanied by a Material Test Report. Report shall contain the following minimum information which will be subject to inspection upon receipt:

- 6.1.1 Statement of material type/grade
- 6.1.2 Chemical analysis that shows the carbon content
- 6.1.3 Material yield strength
- 6.1.4 Material hardness
- 6.1.5 Material Identification Number

	Document Title	Carbon Steel Material for Load Bearing or Pressure Containing Components, 80 Ksi Yield				
	Document No.	ESMA-1005	Rev	C	Page	4 OF 6
	CAUTION: Check for latest revision of this document before use. Information contained in copied or printed material may be superseded.					

7 MATERIAL ACCEPTANCE

- 7.1 All requirements of this specification are subject to verification at the discretion of TAM International.
- 7.2 TAM Engineering Manager or designee is responsible for accepting or rejecting material that does not conform to any portion of this specification.
- 7.3 Any material deviations must be submitted and approved on a Material Deviation Request (PF-09) before machining can begin.

8 DOCUMENT REVISION

- 8.1 Document revisions will be managed in accordance with SOP-009 Document Control.
